Professional Summary

Final-year Artificial Intelligence and Machine Learning engineering student with hands-on experience building full-stack Java and Spring Boot applications, RESTful APIs, and responsive web front ends. Skilled in Core Java, Spring/Spring Boot, MySQL, and React, with practical experience in version control and agile task tracking through internship and project work.

Technical Skills

- Languages: Java, JavaScript, Python
- Core Java: OOP, Collections Framework, Exception Handling, Multithreading
- Java Technologies: JDBC, Servlet, JSP, Hibernate (ORM), JPA, Spring, Spring Boot, Web Services
- Spring Framework: IoC, AOP, MVC, Dependency Injection, Autowiring, Bean Scope and Lifecycle, Annotation-Based Configuration
- Spring Boot: Auto-Configuration, Starters, REST Controllers, Spring Data JPA, Application Properties
- Database: MySQL
- Frontend: HTML, CSS, JavaScript, Bootstrap, Tailwind CSS, React
- Backend: Node.js, Express, REST APIs
- Tools & Platforms: Git, GitHub, JIRA, Maven, Tomcat, Eclipse, VS Code, Postman, MySQL Workbench

Projects

Blind AI Assistant — AI, Computer Vision, Mobile Application

- Built a mobile application that helps visually impaired users identify objects around them using real-time camera input
- Implemented computer vision models for real-time object recognition and classification
- Delivered audio-based feedback so users receive spoken descriptions of detected objects, improving accessibility and independence

CustomerHub — Java, Servlet API, JDBC, MySQL

- Built a customer registration web application using the Java Servlet API
- Connected the application to a MySQL database using JDBC for persistent storage
- Implemented input validation to ensure accurate customer data before saving records

SemTrack — Java, Spring Boot, Spring Data JPA, MySQL, REST API

- Built a Spring Boot application backed by Spring Data JPA and MySQL for data persistence
- Designed and implemented REST APIs to support core application functionality
- Structured the project using a layered architecture (controller, service, repository) for maintainability and scalability

Document Design Website — HTML, CSS, JavaScript, React, JIRA

- Built a React application that lets users create and customize templates such as certificates, letters, menus, and social media posts
- Implemented responsive CSS layouts and optimized component rendering for a smoother design experience
- Tracked features and coordinated the development timeline in JIRA

Experience

Web Development Intern — Mmeac IT Services, Pune

April 2024 – Sept 2024

- Built responsive web pages using HTML, CSS, JavaScript, and React
- Collaborated with the team using GitHub for version control, including pull requests and repository management
- Coordinated sprint planning and ticket tracking in JIRA as part of an agile team workflow

Education

Savitribai Phule Pune University, Pune, Maharashtra, India

Sept 2023 – May 2026

- Bachelor of Engineering in Artificial Intelligence and Machine Learning

MM Polytechnic College, Pune, Maharashtra, India

April 2021 – Oct 2023

- Diploma in Computer Engineering
